// PROFESSIONAL SUMMARY

Agentic Designer. 15 years delivering product — today I ship SaaS, design systems, and frontend with agents as force multiplier.

// EXPERIENCE HIGHLIGHTS

BOOZ ALLEN HAMILTON · DEVELOPER PORTAL2024 — 2026

Developer Portal — design system + dark-first DS, shipped as agent-consumable skill

Two intertwined design systems for a government-facing developer platform: /te-skin, a 17-component slash-command skill that agents invoke to return ready-to-use HTML + CSS + W3C tokens; and TE Black, a dark-first enterprise DS where every semantic color carries its WCAG audit inline. Packaged, versioned, agent-ready.

- /te-skin — 17 components, versioned 2.0.0, HTML + CSS + JSON metadata per component
- TE Black — dark-first DS with WCAG ratio stored inline with every token, rejected values kept as audit trail
- 3-layer CSS (tokens / components / patterns), shadcn alias layer for React drop-in, Houdini + canvas mesh-gradient backgrounds
- Design DNA codified: hard constraints, soft guidelines, named anti-patterns, testing checklist
