PROFESSIONAL SUMMARY

I ship real products – and I ship the tools agents use to help me ship them.

Fifteen years of delivery. Enterprise clients, production SaaS, active consulting at Booz Allen Hamilton. I keep the craft; agents give me the leverage.

SELECTED CASES

BOOZ ALLEN HAMILTON · DEVELOPER PORTAL2024 – 2026

/te-skin – a design system as an agent-consumable skill

Packaged a 17-component design system as a slash-command skill (/te-skin) that AI agents invoke to return ready-to-use components — HTML + CSS + W3C-token JSON each — from a machine-readable index. Proof that 'Agentic Designer' is not a role I claim, but one I ship.

- 17 components, versioned 2.0.0, HTML+CSS+JSON metadata per component
- Design DNA codified: hard constraints, soft guidelines, named anti-patterns, testing checklist
- W3C-format tokens + CSS custom properties side by side — one source, many consumers

EnRegla – compliance SaaS, 0 → 1.0-MVP in 40 days

SaaS de compliance multi-sede for LATAM SMBs. 0 → 1.0-MVP in production in 40 days, co-built with Claude Code using MCP servers and parallel subagents.

- 346 commits · 21 SQL migrations · 31 UI components · 1 edge function with cron
- Supabase MCP server wired into Claude Code for direct SQL + migrations
- Recursive DS migration (17 parts × 5 rounds) scored 78.4 → 95.6

Life Update Mobile – Gemini API in runtime

Personal tracking system — daily entries analyzed by Gemini in runtime, semantic distance to a 5-year plan, Steve-Jobs-style focus metrics (3 things a day). Shipped 0 → production in a day.

- Gemini API runtime for semantic analysis of daily entries
- Hybrid data model: .md files as source of truth + DB as execution engine
- Next.js 16 + NextAuth v5 + Prisma + Supabase, 20 commits in 24h

GEMINI API NEXT.JS 16 PRISMA 0 → PROD / 1D

TE Black – dark-first DS with a11y audit in tokens

Authored a dark-first enterprise design system with a data-theme='light' override where every light-mode semantic color carries its computed WCAG contrast ratio inline — and the rejected value history. The token file is the audit trail.

- 3-layer CSS (tokens / components / patterns), shadcn alias layer for React drop-in
- CSS Houdini @property + conic-gradient animated borders, glass backdrop-filter
- Hand-rolled canvas mesh-gradient background, 5 parametric orbs, reduced-motion aware
