// PROFESSIONAL SUMMARY

Agentic Designer. 15 years delivering product — today I ship SaaS, design systems, and frontend with agents as force multiplier.

// EXPERIENCE HIGHLIGHTS

BOOZ ALLEN HAMILTON · DEVELOPER PORTAL2024 — 2026

/te-skin — a design system as an agent-consumable skill

Packaged a 17-component design system as a slash-command skill (/te-skin) that AI agents invoke to return ready-to-use components — HTML + CSS + W3C-token JSON each — from a machine-readable index. Proof that 'Agentic Designer' is not a role I claim, but one I ship.

- 17 components, versioned 2.0.0, HTML+CSS+JSON metadata per component
- Design DNA codified: hard constraints, soft guidelines, named anti-patterns, testing checklist
- W3C-format tokens + CSS custom properties side by side — one source, many consumers
