SUMMARY

Senior Product Designer with 12+ years leading product discovery and end-to-end design for complex, regulated environments — federal platforms (DoD, Army, FAA, VA) and B2B SaaS. Cut design-to-development cycle time from ~6 weeks to under 1 week and scaled a design system from 0 to 26 teams at Booz Allen Hamilton. Expert in Figma (Auto Layout, Variables, Dev Mode), design systems governance, accessibility (WCAG 2.2, Section 508) and AI-augmented user research.

SKILLS

- User Research:** User Research · Usability Testing (moderated & unmoderated) · Journey Mapping · Diary Studies · Contextual Inquiry · Card Sorting · Tree Testing · First-Click Testing · NPS · CSAT
- Product Design:** End-to-End Product Design · Product Discovery · Problem Framing · Interaction Design · Prototyping · Design-to-Code (React, TypeScript) · Cognitive Friction Mapping
- Product Analytics & Experimentation:** Mixpanel · Activation Metrics · A/B Testing · Funnel Analysis
- Currently developing:** Jobs-to-be-Done (JTBD) · North Star Metric · PostHog · Dovetail · Maze
- Design Systems:** Design Tokens · Component Architecture · Figma Libraries · Storybook · Shadcn · Radix · Ant Design · Material UI · IBM Carbon
- Accessibility:** Accessibility (WCAG 2.2) · Section 508 · Automated accessibility audits
- AI & Agentic Design:** Agent-ready Design Systems · LLM Persona Emulation · Agentic UX Testing · Custom MCP design · AI-augmented design workflows

TOOLS

Figma (Auto Layout, Variables, Dev Mode, Motion, Figma Make, MCP) · Miro · Storybook · Jira · Linear · GitHub · Vercel · Cursor · Claude Code

WORK EXPERIENCE

- Booz Allen Hamilton**

2022 – Present
- Senior Product Designer (Design-Engineering)**
- Federal Trusted Environments platform + Developer Portal · Army, DoD, FAA, VA
- Led end-to-end product design for the federal Trusted Environments platform and Developer Portal, cutting design-to-development cycle time from ~6 weeks to under 1 week by delivering production-ready React components and screens.
 - Architected 2 design systems on Shadcn, Radix and the BAH Brand Book; adoption scaled from 0 to 26 internal teams across a ~30,000-engineer firm, including the Vellox Reverser cybersecurity product.
 - Established accessibility compliance (WCAG 2.2, Section 508) across the design system, passing 95%+ of automated accessibility checks.
 - Pioneered agentic UX research: built LLM-based persona emulators running hundreds of automated usability tests per screen, validated with moderated usability testing (5 users per feature) — 92% of participants rated the shipped improvements as better.

- Designed an agent-ready dark design system consumed autonomously by other teams' AI agents to generate assets (social stories, presentations) — built before mainstream cloud design tooling existed.
- Designed a custom MCP (Model Context Protocol) server for developers and established NPS and CSAT measurement; problem tickets decreased while feature-request engagement in Aha! increased after faster release cycles.

Compliance SaaS · LATAM

2026 – Present

Lead Product Designer

- Own discovery-to-launch design for a compliance SaaS for LATAM SMBs; shipped a validated MVP in 40 days — the product serves ~280 paying customers on a base of ~2,700 total users.
- Built a 31-component design system in Figma, used across 16 screens and implemented directly in React 19 + TypeScript on Supabase.
- Rebuilt a failing onboarding funnel in 3 weeks using usability testing and AI-persona feedback loops; instrumented end-to-end analytics in Mixpanel and defined the activation metric — new-user activation rose from 2.6% to 9.4%.
- Designed and ran an A/B test on onboarding sign-up (email registration vs. Google sign-in); Google sign-in won, lifting onboarding completion by 74%.

Xentinals DesignOps

2016 – 2022

Design Director / Product Manager

Clients: Merck, Mondelēz, Banco Pichincha

- Directed the DesignOps unit for Fortune 500 clients, scaling distributed multi-theme design systems and token libraries on Ant Design, Material UI and IBM Carbon, plus a custom Shadcn-based design system for Banco Pichincha.
- Led qualitative user research — 100+ user interviews, usability testing and card sorting — defining standard enterprise interaction patterns.
- Reduced client time-to-market by 35% through an optimized design-to-engineering handoff; mentored 12 junior/mid designers.

Earlier experience (2011 – 2017)

Arpatel — Product Manager — Retail POS and CRM product flows

Tecniequipos — Senior Visual Designer / Developer

Canadian Bank Note — Project Administrator — regional technical projects

CERTIFICATIONS

AI for Designers — Interaction Design Foundation (IxDF), 2025

Google UX Design Certificate — Coursera, 2021

Design Thinking — IBM, 2020

Certified Professional in Accessibility Core Competencies (CPACC) — IAAP (in progress)

EDUCATION

M.A. in Interaction Design & UX — Universitat Oberta de Catalunya (UOC) (in progress)

B.Sc. in Computer Systems Engineering — Escuela Politécnica Nacional (EPN)
