Quito · Ecuador

I design software products for **complex, regulated environments**.
Eighteen years in product, fifteen in design. Senior UX judgment, user psychology mapping, and the system design capability to align complex product architectures into frictionless user experiences — AI-augmented research as leverage.

Experience

EXP // SELECTED

2022–NOW

Booz Allen Hamilton

ARMY · DOD · VA · FAA

Senior Product Designer (Design-Engineering)

Led end-to-end UX/UI, user flows, and interaction models for the federal Trusted Environments platform and Developer Portal. Designed and architected two parallel WCAG 2.1 AAA accessibility-compliant design systems (/te-skin and TE Black), documenting strict usability rules and component anti-patterns. Pioneered agentic UX research: developed custom LLM-based user persona emulators to run automated usability tests, mapping cognitive friction and user journeys before development. Consulted cross-team Army/DoD product managers and engineers on secure UI pipelines, bridging design intent with production code.

2026–NOW

Compliance SaaS · LATAM

PAYING PILOTS

Co-founder & Lead Product Designer

Co-founded and led product design from discovery to launch, translating complex regulatory requirements into a simple, self-serve SMB compliance tool. Conducted user interviews, mapped cognitive patterns, and designed the onboarding and core dashboard flows, shipping a validated MVP in 40 days. Designed a modular 31-component UI system in Figma and implemented it directly in React/TypeScript, ensuring 100% layout fidelity. Built agentic feedback loops to simulate user pathways, optimizing conversion funnels and reducing activation drop-offs.

2016–2022

Xentinel DesignOps

Design Director / Product Manager

Directed the DesignOps unit, scaling distributed, multi-theme design systems and token libraries for Fortune 500 enterprise clients (Merck, Mondelēz, Banco Pichincha). Led qualitative user research (n>100 interviews, usability testing, and card sorting) to establish standard enterprise interaction patterns. Streamlined design-to-engineering handoff workflows, reducing product time-to-market by 35% and establishing a single source of UI truth.

2011–17

Arpatel · Tecniequipos · Canadian Bank Note

Co-founder / Senior Designer-Dev / Project Admin

Built product design foundation through engineering and product management roles: designed retail POS and CRM flows, co-founded product ventures, and administered regional technical infrastructure projects.
