// PROFESSIONAL SUMMARY

Compliance-first product design for regulated industries. WCAG 2.1 AA and Section 508 audited inside design tokens. Documented handoff to senior engineering. Fifteen years across defense, banking, and pharmaceuticals.

// SELECTED WORK

● BOOZ ALLEN HAMILTON · TRUSTED ENVIRONMENTS 2022 – 2026

Multi-theme design system for DoD / Army product teams

Delivered two parallel design systems on the Trusted Environments umbrella — one dark-first with WCAG 2.1 AA audited inside the token set, one packaged as a reusable skill for downstream teams. Both deployed against SharePoint-engineered single-page applications.

- 17 components, versioned, documented with hard constraints, soft guidelines, and named anti-patterns
- Accessibility audit encoded in tokens so contrast and focus compliance survives component composition
- Handoff to senior engineering teams in DoD programs · cross-workstream collaboration with product and research
- SharePoint SPA engineering — enterprise stack, not hipster tooling

● BANCO PICHINCHA · DIGITAL PRODUCTS 2017 – 2021

Regulated-banking UX · accessibility + consistency at consumer scale

Digital product design for a tier-1 Ecuadorian bank — consumer-facing applications operating under banking regulation and accessibility requirements. Design system contributions consumed across multiple digital surfaces.

- Compliance-aware UX patterns for regulated financial flows
- Accessibility considerations integrated with engineering handoff
- Component library contributions consumed across multiple product teams

2022 – PRESENT

DESIGN-ENGINEERING CONSULTANT

Design-engineering across the Trusted Environments umbrella at BAH serving DoD and US Army product teams. Built two parallel design systems including a dark-first system with accessibility audit encoded directly in the tokens. Delivered a SharePoint-engineered single-page application. Cross-team consulting with senior engineering and product leads.

- WCAG 2.1 AA tokens audited with senior engineering. SharePoint/M365 stack. Documented handoff to in-house dev teams.

2016 – PRESENT

PRODUCT MANAGER / UX-UI DESIGNER

Formalized a team within Central Design to deliver a distributed-yet-centralized Design System. Defined roadmap, roles, responsibilities, and ways of working. Built a contribution culture to scale. Delivered a unified set of guidelines, tokens, and accessible components for enterprise clients.

- Governance model for distributed contributors. Accessibility baked into tokens. Clients include Merck, Mondelēz, Banco Pichincha.
